Whole-Home Water Treatment

HOUSEPURE

by Water, Inc.

Have you ever questioned the quality of your water? You deserve the very best water quality and have a choice of how to treat your water. For more than 30 years, the Water, Inc. name has represented quality performance and customer protection.

The HousePure® line by Water, Inc. offers a wide variety of treatment choices for the informed consumer. Systems have been designed for both home and business use.

Options are available for a variety of water treatment concerns including taste and odor, scale control and hardness. Whether bathing, cleaning or laundering, the HousePure line of equipment is designed for quality peace of mind.

Options To Fit Your Lifestyle

Choose The HousePure System that best suits your needs

Contaminants Reduced	HP 01-04	HP ScaleStop	HP Soft	HP Secure
Chlorine, Chloramine, Bad Tastes & Odors (GAC)	✓	✓		
Heavy Metals and Bacteria Inhibition (KDF-55)	✓	✓		
Scale Elimination (non-salt based alternative)		✓		
Hardness Minerals Elimination (soft water)			✓	
Phosphate Scale Control (tankless water heaters)				✓
Water, Inc. Performance Warranty/Guarantee	✓	✓	✓	✓

The contaminants or other substances removed or reduced are not necessarily in your water.

Tested and certified by NSF International to NSF/ANSI Standard 42 for material requirements

Whole Home Water Treatment easy. simple. effective.

Granular Activated Carbon (GAC)

Water, Inc. utilizes a premium grade Coconut shell carbon that has superior absorption capabilities. Two HousePure® Whole Home Systems utilize the highest grade GAC available for quality and performance. Carbon filtering is most effective at reducing chlorine, sediment, and volatile organic chemicals (VOCs) from water. GAC is also effective at reducing chloramines, color molecules, and other organics.

How effective is Water, Inc. Coconut Shell Carbon GAC? In fact, activated carbon is so highly effective at absorbing compounds that a three-gram sample of GAC is equal to the surface area of an entire football field. Water, Inc. GAC will effectively perform for 10 to 15 years, depending on overall water quality.

KDF-55 Medium

KDF-55, which stands for "Kinetic Degradation Fluxion" is a proprietary media that helps neutralize Chlorine and Chloramine, reduces heavy metals, while inhibiting bacteria growth. In addition, KDF assists with scale control, to help extend the life of appliances. Each HousePure® Whole Home system integrates KDF along with the highly absorptive Granular Activated Carbon.

HousePure® with WATTS® ScaleStop Media

HousePure® with WATTS ScaleStop is a revolutionary scale-elimination media that has been proven in over 9 years of commercial and residential use in Europe as well as the US. The proprietary media employs a certified science called Template Assisted Crystallization (TAC) that forces scale minerals to attract onto a small bead and form a crystal, which is then harmlessly flushed down the drain- avoiding costly and annoying scale damage. This advanced media provides a scale control alternative to salt-using water softeners without the need for monthly salt replacement. HousePure® ScaleStop should be changed every 3-years.

Polyphosphate Media

Polyphosphate has been used for decades in the commercial industry to help alleviate the affects of hard water- which creates scale. Water, Inc. has innovatively combined the scale control advantages of FDA food grade polyphosphate with advanced sediment filters to create a Point-of-Use protection for tankless water heaters.

HousePure® 01-04

01-02 03-04

- Advanced whole-home water conditioner.
- Provides overall water polishing to all faucets and appliances with excellent taste & odor, aesthetics and overall water improvement.
- Four models available- two 1" units with 14 GPM and 24 GPM options and two 1-1/4" units with 14 GPM and 35 GPM flow rates.
- Industrial grade backwashing control valve.
- Circuit board settings power backup.
- Water, Inc. performance warranty.

HousePure® ScaleStop

- Innovative alternative to salt-using water softeners, provides salt-free scale protection.
- Provides overall water polishing to all faucets and appliances with excellent taste & odor, aesthetics and overall water improvement.
- Two models available- a 12 GPM, 1" unit and a 16 GPM, 1-1/4" unit. Each model has 2 tanks.
- Industrial grade backwashing control valve.
- Circuit board settings power backup.
- Water, Inc. performance warranty.

HousePure® Soft

- High efficiency water softener.
- Delivers softened water to all faucets and appliances, greatly extending the life of the home and business while creating gentle, soft feeling water.
- 1-1/4" model with 19.2 GPM flow rate.
- Industrial grade control valve with 2 Cubic Feet of high efficiency resin providing 24,000 grains per gallon softening capacity.
- Circuit board settings power backup.
- Water, Inc. performance warranty.

HousePure® Secure

.75 1.5

- Tankless Water Heater Scale Protection.
- Commercially-proven, FDA-grade polyphosphate beads suspend hardness minerals sending them harmlessly down the drain while protecting costly heat exchangers.
- 3/4" unit with a 5-micron sediment filter with scale control flow rate of up to 7 gpm.
- 1-1/2" unit with a dual-gradient 50/5- Micron sediment filter with up to 20 GPM.
- Filter-change monitor and performance warranty.
