for material requirements.

Meets National Lead Laws including NSF 372 - 2011 Drinking Water System Components -
Lead Content and S.3874, Reduction of Lead in Drinking Water Act, CAAB 1953 and VT Act 193.

WHOLE HOUSE WATER FILTER SYSTEM

Utilizes innovative, salt and chemical-free technology to extend the life of plumbing fixtures and appliances while providing great tasting and gentle water at every point of use in the home. HousePure utilizes a combination of coconut shell activated carbon and KDF-55 media. Together these mediums create superior dechlorination, bacteria inhibition and taste/odor improvement. These self-standing units are equipped with self-clean automatic backwashing. Several model options are available. Read below to see a comparison of which model is right for your home.

CONCERNED ABOUT CHLORAMINES?

You can upgrade to more complete chloramine reduction. Our non-chemically impregnated coconut based activated carbon has been surface modified. This upgrade is 3 times more effective than competitive products and 15 times more effective than our standard HousePure media.

NOW ADD OPTIONAL SCALE CONTROL*, ALL IN ONE TANK WITH **TURBO TAC!** (ON CHLORAMINE MODELS ONLY)

Upgrade your system to add water conditioner treatment for the entire home.

The TURBO TAC upgrade provides the most effective alternative to salt-using water softeners, reducing harmful scale buildup throughout pipes, dishes and appliances while retaining beneficial minerals in the water supply. *This system does not require salt.*

Important note: TURBO TAC is not a water softener - please read and sign the customer expectations form on page 31 before purchasing.

When installed in homes with new pipes, system must be in bypass mode for 120 days before use.

WANT A WiFi* UPGRADE? Have your HousePure at your fingertips. Upgrade to our latest Bluetooth & WiFi-enabled controller.

**The TURBO TAC and/or WiFi upgrades are only available on the Chloramine models.*

MAXIMUM recommended line pressure for this product is 75 PSI. Pressure above 75 PSI indicates the absence of a properly functioning water pressure regulator at the property. Excessive water pressure poses a risk of property damage to you. Problems due to excessive water pressure are NOT covered by this product's warranty. **BEFORE** installation of any Water, Inc. product, **confirm that water supply pressure does not exceed 75 PSI.** Questions?
